

Direcht LD

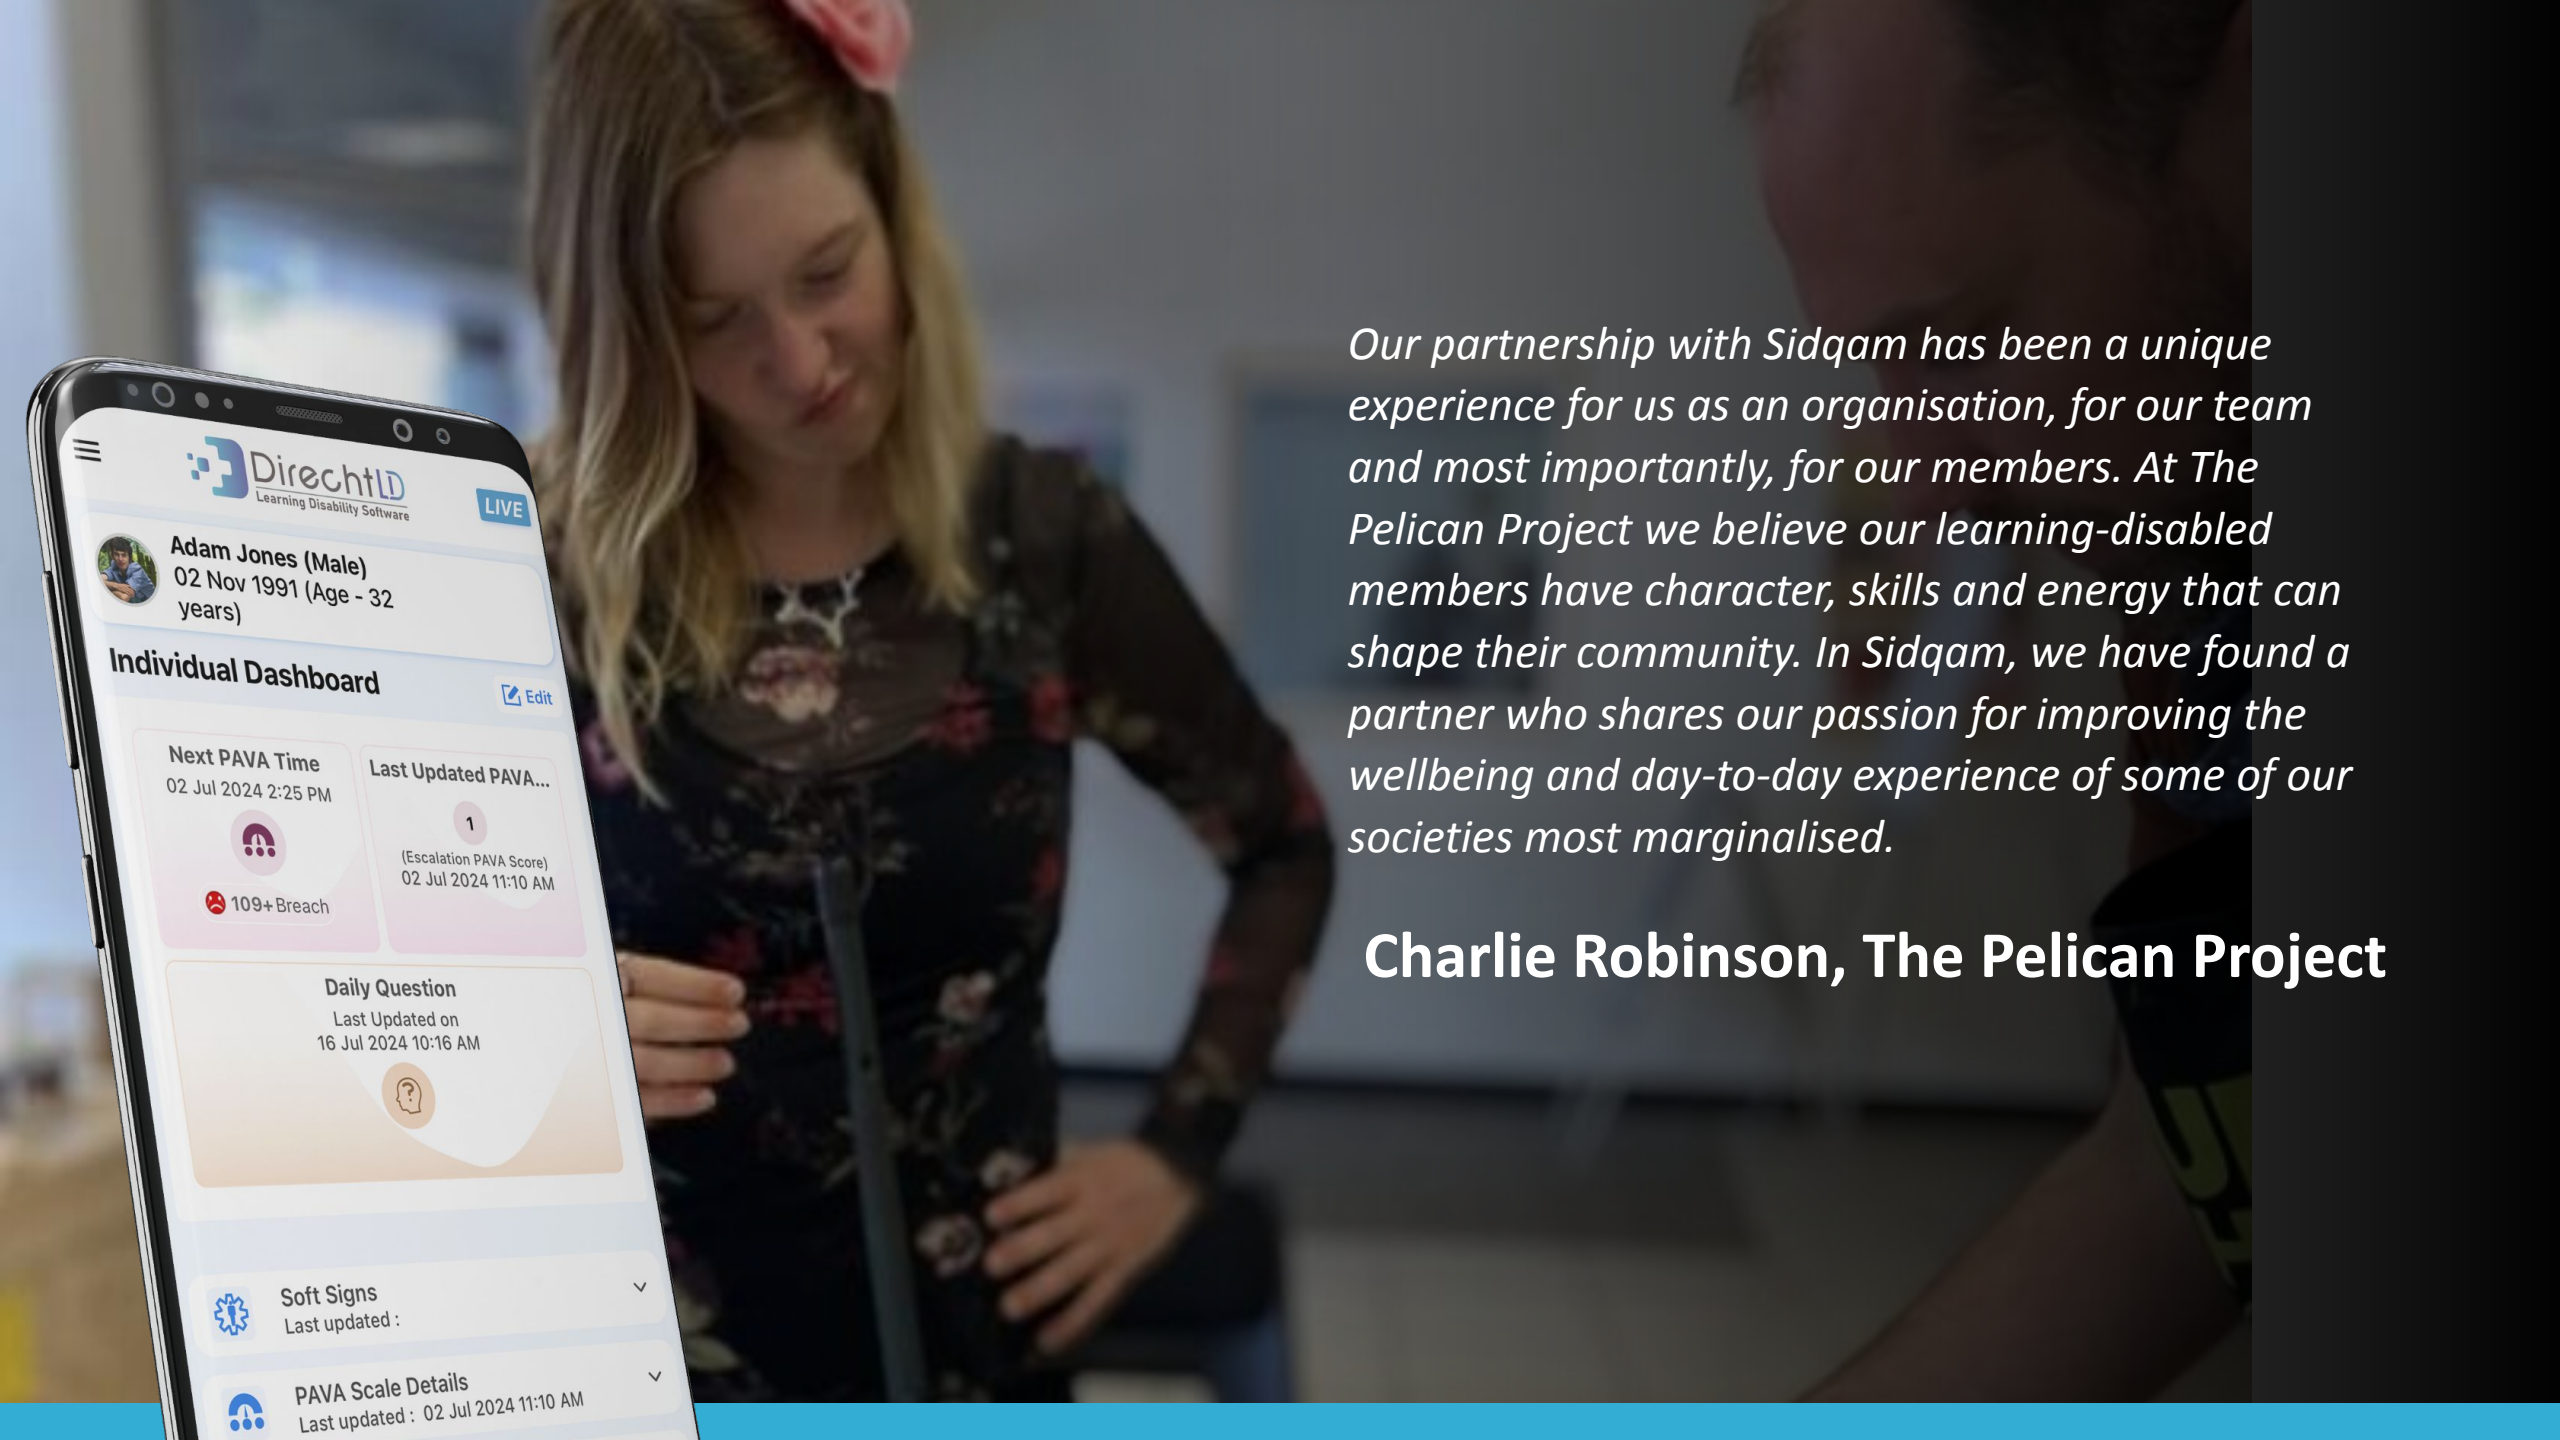

Direcht LD is a software solution built for smartphone and tablet, created specifically for learning disability environments.

Designed around a bespoke form builder to gather meaningful daily feedback from service users to assist caregivers, and to support funding applications and audits.

Our Partners

Our partnership with Sidqam has been a unique experience for us as an organisation, for our team and most importantly, for our members. At The Pelican Project we believe our learning-disabled members have character, skills and energy that can shape their community. In Sidqam, we have found a partner who shares our passion for improving the wellbeing and day-to-day experience of some of our societies most marginalised.
