

Hospital at Home

Direcht Wards is a modern virtual ward solution that helps reduce readmissions and the need for hospital beds by allowing healthcare teams to monitor patients remotely. Our AI enabled system aims to improve patient care by providing a proactive and intelligent approach that works both inside and outside of the hospital.

Our Partners

Who do we pitch to?

Direcht Wards is a scalable solution that can adapt to multiple environments including local authorities, public and private healthcare environments.

Local Authorities

National Health Service

Private Hospitals

How much could Direcht Wards save?

Right now, these are the costs within a traditional hospital environment.

£7 for a call
with no
further
action

£419 for a
trip to
hospital
with no
further
treatment

£722 for an
ambulance
call out and
1 night in
hospital

£252 for an
ambulance
to attend
and treat at
scene

£400 per
patient, per
day on a
ward.

Direcht Wards could save on these costs.
